Mohit Kaushal

SOFTWARE DEVELOPER

EDUCATION

Bachelor of Technology (B.Tech.)

Poornima Group of Institutions: 2018-2022

Specialization in Computer Science and Engineering

Senior Secondary Education

LBS Senior Secondary School: 2017-2018

Specialization in Science/ Maths

Secondary Education

LBS Senior Secondary School: 2015-2016
SKILLS

Java & Spring Boot

Angular & ReactJs

Php (Laravel, Codeignitor & Cakephp)

NodeJs

Database (MongoDB & SQL & Postgres)

LANGUAGES

English
Hindi
Punjabi

PROFILE

Senior software developer with over 4 years of experience designing and implementing software solutions for a variety of industries. Skilled in a wide range of programming languages and platforms, with expertise in Java, Php, NodeJs and cloud-based solutions. Proven track record of delivering complex projects on time and within budget, with a strong focus on collaboration and teamwork. Excellent communicator with a reputation for building strong relationships with stakeholders at all levels.

EXPERIENCE

Axestrack Software Solutions   **Oct 2021- Present**

Senior Full Stack Developer and Team Lead

I'll be responsible for managing a group of software developers and coordinating their efforts to ensure the successful delivery of projects.
- This include products which help for smoother transportation.
- Software like In-route tracking, In-plant automation and Transport Management System

OrsootLLP Software Solutions   **APR 2021- DEC 2021**

Full Stack Developer

Working as a full-stack developer and help to build many client projects with team and standalone.
- Some valuable skills which i learned from this organisation is how to manage multiple clients and develop software from root.
- Team work is a key feature in this duration because I'm working in 15 members team.

Connect Globes   **APR 2020- DEC 2020**

Junior Full Stack Developer

Working as a Junior developer under some brilliant software developers leads to increase my technical skills.
- Worked on Threejs library which helps to manage 3D objects in our website.

PROJECTS

Fotato Food Co.

By contributing my technical expertise to the development of "Fotato" I played a key role in revolutionizing the restaurant industry and empowering businesses to thrive in the digital age. Technology use in these project is:

- Frontend & Backend – Php (Laravel)
- Database – Phpmyadmin
- Server – Cpanel ubuntu

Dealer-Retailer Web/ App

Desgin Admin portal and Client App for association of retailer. Technology serve to ease the process of retailer shop and digitalizing their process like add sale by scanning barcodes and design barcode for each products like Mobile covers, Tempered cards and Mobile phones.

- Web Frontend – ReactJs
- App UI – React Native
- Backend – NodeJs
- Database – Phpmyadmin
- Server – Hostinger VPS (ubuntu Server)

X-sights

Unique portal to design user friendly and highly customizable graphs, pivot table and Dyanmic dashboards over data limit of 2 millions of rows. Implements Multi-threading for process large amount of data.

- Web Frontend – Angular
- Backend – Java (Spring boot)
- Database – PostgresSql
- Server – AWS (EC2 Machine)

Prime-chat

Chat portal for cooperate office where we get features like arrange meeting, create todos, create task and apply leave. All these along a beautiful feel of chat like WhatsApp. Technology include:

- Web Frontend – Angular
- Backend – Java (Spring boot)
- Database – PostgresSql & MongoDB
- Server – AWS (EC2 Machine)

Connected Plant Logistics

InPlant Automation Software is a powerful and comprehensive software solution designed to revolutionize and automate industrial processes within manufacturing plants, warehouses, and distribution centers. Our cutting-edge software harnesses the power of automation to enhance operational efficiency, reduce costs, and optimize productivity.

- Web Frontend – Angular
- Backend – Java (Spring boot)
- Database – PostgresSql & MongoDB
- Server – AWS (EC2 Machine)

In Addition I use python and certain controllers like Raspberry Pi to control certain hardwares like Traffic light, LED Display and RFID reader to fully automate process of plant.
